Electronic access control using ELLsys®

The ELLsys software is user friendly program for online management of electronic components of the type ELLocks, developed and produced by "Mauer Locking Systems" Ltd. The system has some unique features, among which:

- Possibility to work "in the cloud", which eliminates the long and time consuming installation process;
- User friendly interface;
- Management of the data base from any spot in the world, which is internet connected;
- Mobile version of the software, suitable for smart phone or tablet;
- Possibility for programming of time zones, working shifts, holidays, etc.;
- Possibility for management of unlimited number of users;
- Possibility for management of unlimited number of user groups;
- Possibility for programming of access zones;
- Log reports for an unlimited number of events at user, access point or general system level;
- Log reports in PDF or Excel;
- Possibility for blocking any user card or access point.

Online software
